Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3,5-6,8,10-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Chmela et al. Chmela et al discloses the use of an one-piece unitary body (1) having a base (4) and two sides (2,3) extending at a 90-degree angle therefrom. Chmela et al. further discloses that the edge protector is made from a lightweight transparent material.

3. Claims 1-2,13-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Pryce. Pryce discloses the use of an one-piece unitary body (3) having a base (5) with an aperture (5) in order to allow for a threaded shank from a leg in order to attach the body over an edge of an article of furniture (see Figs. 4 and 5).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3-12, and 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pryce in view of Chmela et al. Pryce shows a plurality of apertures (or perforations (12)) formed

in the sides of the body. Pryce fails to teach the use of a triangular shaped body having two sides extending at a 90-degree angle from the base. Chmela shows the use of a body having two planar sides extending at a 90-degree angle from a base (see 102 rejections). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the body of Pryce with a shape as taught by Chmela in order to better accommodate furniture with very sharp edges.

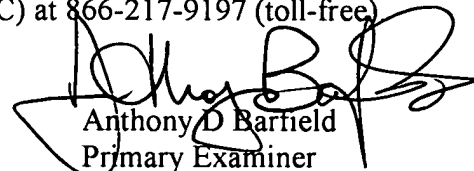

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference Nos. 5,508,078, 5,040,684, and 4,153,230 show features of the claimed invention.
